

Memories...

Are you concerned about forgetting?

Everyone loses a key or forgets a name.

When should you be concerned?

Are you or someone you love...

- Forgetful?
- Confused?
- Losing things?
- Disoriented?
- Having mood changes?
- Behavior changes?

It might be time to consider a memory screening.

Why is it important to have a memory screening now?

Your physician can then determine if these changes are normal, if they can be treated, or if they are reversible.

Free Screening

Your local Aging & Disability Resource Center does FREE screenings, and it takes less than 15 minutes.

Call 877-794-2372

to speak with a friendly professional in
Crawford, Juneau, Richland, or Sauk County

Deaf, hearing or speech impaired callers may reach ADRC offices through the Wisconsin Relay System by dialing 711.
